Recent Computer Science graduate with a first-class honors degree, passionate about developing innovative software solutions. Skilled in C#, Python, web development, data analysis and cybersecurity, with hands-on experience in full-stack projects and database design. I have experience using AI-assisted development tools to support software development, debugging, documentation, and research workflows. Lots of experience in customer service sectors and looking to put my skills to work. Currently looking for a Software Developer role.

Programming Languages

- C#
- Python
- JavaScript
- HTML
- CSS

Tools

- Git
- GitHub
- Visual Studio
- Microsoft 365

Frameworks & Platforms

- ASP.NET
- Unity
- Ionic
- Firebase

Cyber Security

- Kali Linux
- Wireshark
- Network Security Fundamentals

Databases

- MySQL
- Firebase Realtime Database

Development Practices

- Agile
- Scrum
- Version Control
- Software Testing

Education and qualifications

Sept 2020 – July 2024:

Dublin Business School – BSc (Hons) in computing

- Graduated in 2024 with a first- class honors degree.
- Completed over 20 assignments, 15 individually and 5 group projects.
- This course emphasised **project management, data science, data architecture web development, and the basics of coding in C# and Python.**

Notable Completed Projects

- Developed a working real estate application using Ionic and Firebase, enabling secure user login and property management.
- Built a basic ASP.NET website using HTML, CSS and JavaScript.
- Designed and implemented a secure networking simulation using Kali Linux and Wireshark to perform MITM attacks.
- Created an entire game using Unity Game engine and C# for my Capstone project.

Bakery Scramble - Published Android Puzzle Game (2026)

- Developed and published merge-puzzle mobile game using Unity (C#) for Google Play Store
- Managed closed beta testing phase with 14 testers, implementing feedback and bug fixes before public release
- Implemented touch-based gameplay mechanics, adaptive difficulty system, and local data persistence
- Optimized performance for Android devices with IL2CPP scripting backend
- Ensured Google Play Data Safety compliance with zero data collection policy
- Built responsive UI system supporting multiple screen sizes and safe area handling

Work Experience

Michael Briscoe's Electrix (Dec 2025 – Present)
